

OPTICAL BRIGHTENERS (OBA)

GLOBAL-OBA (Optical Brightening Agents) – also known as Fluorescent Brightening Agents

These additives are often used to enhance the appearance of color of fabric, paper and plastics, causing a "whitening" effect. It makes intrinsically yellow /orange materials look less by adding the deficit in blue and purple light reflected by the material, with the blue and purple optical emission of the fluorophore.

APPLICATION OF OPTICAL BRIGHTENER

- ◆ Series for Cotton, Rayon
- ◆ Series for Polyester
- ◆ Series for Nylon, Polyamide, Wool, Silk
- ◆ Series for Acrylic
- ◆ Series for Paper
- ◆ Series for Detergent, Soap
- ◆ Series for Plastic, Ink and Paint
